

Installation of Print Tracker is simple, and usually takes only a few minutes. Print Tracker may be installed on a workstation that remains on most of the time (such as an administrators PC), or on a server. Follow the simple instructions below to complete your own installation:

1. Click on the download software link provided.
2. When the Print Tracker software begins to load several screens will appear as the installation wizard operates. Click 'Run', 'Next', and 'Finish' as appropriate.

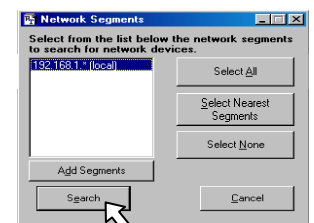

3. When the registration screen appears, the Dealer ID, Password, and e-mail address fields will be pre-populated.
4. Enter your customer Name and contact information.
5. Click the 'Get License Key' button. A license will populate in the 'Key' field.
6. Agree to receive email reports.
7. Click the 'Save and Close' button.

Print Tracker will begin to seek devices, checking for locally connected first then prompting for a network search. Click 'Yes'.

Print Tracker searches for IP segments, and pops up the Network Segments dialog box. Here one can add additional IP segment if desired.

8. Click on the 'Search' button to complete device discovery. Print Tracker will finalize the installation.
9. When the software has finished the install, send an email report when prompted, and then close the program.

The installation is complete.
